

November 10, 2025 CAST Minutes

Present: Dana Clawson, John Reid, Lee Michaelides, Jen Durgin, Justin Righter, Laura Simon
Public: Nadim Kassir

Motion to approve amended October minutes: Passed

Culvert Crawlers App has been released. Dana will forward the link.

There was a discussion about submitting a Dartmouth Community Grant given that the chance for approval was slim since Dartmouth and Hartford already have a working town/gown relationship with the Culvert Crawlers Program. It was decided to move ahead anyway because the thinking behind the grant might lead to funding for the idea from other sources including the Vermont Law School.

There was a discussion about when and how to get emission data from the town due to staffing issues. Dana was going to see what data CAST might access directly. There was also talk about how the bond bank might fund large mitigation projects like emission control at the sewer plant.

On the agenda for the next meeting: Identify the top three priorities for mitigation. Also, since the goals of the CAP cannot be met, what alternatives are there for CAST to implement?
